## PRODUCT INSPECTION NOTICE

October 13, 2021

### **ATOM™ Class III Harness.**

**Part# 202122, 202124, 202125, 202222, 202224, 202225, and custom configurations.**

CMC Rescue has become aware of an issue regarding the ATOM™ Harness. A thread specification issue has caused the Fall Arrest Indicator to activate at a higher load than designed. This will not affect user safety, but will affect the decision to use the harness after a fall is taken.

CMC requests that you inspect all harnesses after a fall load has been taken. If any of the following is discovered please immediately remove the unit from service as per User's Instructions:

- Fall Arrest Indicator deployed.
- Webbing damage near buckle or hardware.
- Distorted attachment points.
- Structural stitching damage.

If you identify any of these or you have any questions, please contact our customer support team by calling (800) 513-7455 or (805) 562-9120, or via email at [info@cmcrecue.com](mailto:info@cmcrecue.com).

Thank you for your continued support and trust!
