LEARN BY DOING

Long recognized as a leader in the rescue and work-at-height equipment industries, CMC applied its expertise and resources to the development of a curriculum for teaching technical rescue and rope access skills. It's hands-on method, taught by the industries' most seasoned professionals, is what sets the school apart from other training programs.

Open Enrollment & Contract Classes give students the flexibility to select a training program that is best suited to their industries.

Seasoned Instructors bring decades of pride in professional service to the classroom.

Leading Authority in our continually evolving curriculum, which is designed and developed by instructors who regularly contribute to standards committees and work with state training organizations.

Applied Learning allows students to readily access knowledge, skills and techniques gained in rescue-response situations taught in realistic settings.
