

RAPPEL GT™ GLOVE

SCAN FOR
MORE DETAILS

The Rappel GT combines advanced hand protection with the exceptional dexterity needed for tying knots and working with hardware. A double layer at the thumb web adds protection for rappelling, and the wear-resistant double-palm guards against heat, moisture, cold, and abrasion. The Rappel GT is made from a goat skin leather yielding a softer, more supple feel that lends to better dexterity than standard cow leather.

The anatomically segmented second layers increase durability while enhancing grip and reducing fatigue. The back of the glove is equally detailed with insulated spandex to provide a blend of temperature regulation, flexibility, and comfort, while elastic at the wrist ensures a secure fit. Stowage loops allow these gloves to be clipped to a harness when not in use.

CE marked and certified to EN 388 & EN ISO 21420

FEATURES

- Double layer of leather at thumb web for protection when rappelling and handling rope.
- Wear-resistant double palm guards against heat, cold, moisture, and abrasion.
- Anatomically segmented second layer eases grip fatigue.
- Spandex back ventilates while adding flexibility and comfort.
- Elastic around the wrist for secure fit.
- Carabiner loops sewn into wrist for stowing on harness.
